Drawing from Scratch

Have you ever watched an artist draw or sketch and it looks effortless for them, but not to you? Have you ever wondered about the drawing process and the technical skills required to produce a convincing drawing utilizing a blank piece of paper and a series of graphite marks? Do you want to impress your family and friends with your artistic and creative abilities? If you've answered YES to any part of these questions, then we invite you to join us for an Intensive Summer Drawing Session – Drawing from Scratch 2022. During this week-long course, you will begin to develop the skills and understanding of traditional drawing materials, and how to use them successfully to create a still-life drawing directly from observation. We will start our week by becoming familiar with the way different drawing pencils and techniques affect the work and how to effectively use these art tools, to developing an understanding of value contrast (shading), proportion and perspective while exploring different subjects to draw such as self-portraits and interesting things outdoors. By the end of the week, you will be completing a fully-developed drawing that you'll want to hang on your wall. This Drawing from Scratch 2022 course will teach you the ins and outs of the drawing process in a relaxed and fun-filled studio environment. It's a great way to start your Summer!
