**Will extracurricular activities be shut down?**

As of right now we are using mitigation strategies such as masking, no concessions at sporting events, limited numbers of spectators and taking brief pauses when there are cases on a team instead of shutting down extracurricular activities. We will not close down extracurriculars unless we need to take a pause for a short period of distance learning based on our case count and spread at school.

**If a teacher gets Covid will they go virtual?**

If a teacher gets COVID they will submit lesson plans and use Canvas while a substitute teacher covers the class and delivers instruction. The teacher may choose to zoom into the classroom for a live interaction, but is not required to do so. There is a tipping point where if a certain number of teachers are out, we would not be able to cover classes with enough substitute teachers and this would require us to take pause for a short period of distance learning.

**Is it a concern or possibility that the school would go through fully remote at some point?**

We are doing everything we can to contain the spread of COVID and keep the school open. We are partners in this which means we need everyone to properly mask at all times (teachers are vigilantly enforcing this, but we need all students to cooperate and participate), maximize vaccines and boosters, social distance as much as possible, and keep your outside of school interactions as small as possible.

If we need to shift to distance learning, it would be for a short period of time.
